

T.A.R.I. TAX INFORMATION

(2019)

The TARI 2019 tariffs have been determined by applying the potential production coefficients of the waste estimated by the Presidential Decree n. 158/1999 since the system in use for the timely detection of waste has generated some management problems.

Vegetable waste collection at home: the service will be guaranteed on request by calling the toll-free number at the cost of euro 8.00 per intervention. Vegetable waste can be delivered directly to the collection centre without charging any fee. The weight of the waste will still be measured.

• HOUSEHOLD UTILITIES

In the TARI of household utilities, a fixed number of collection of unsorted waste is included and it is determined based on the components of the family unit as summarized below:

number of components	number of collections of unsorted waste included in the TARI per 25 liter bin	extra collections
1	12	For each collection of unsorted waste of 25 liters, beyond the allowed quantity, the cost of 2.00 euros will be charged. Users with minors under 3 years will be able to hand in the unsorted waste once a week without additional costs, using the 25-liter bin, regardless of the number of components indicated in this table. In case these users have requested the 50 lt bin, to sort the nappies of children under 3 years, in the TARI it will be included the number of contributions reported in the present table from 25 lt and n. 12 contributions of 50 liters regardless of the number of components. For each transfer of unsorted waste of 50 liters, over the allowed quantity, the cost of 4.00 euros will be charged. Utilities with subjects that use health devices can confer these facilities, using the appropriate 50 lt bins, twice a week without additional costs applied.
2	24	
3	30	
4	36	
5	42	
6 or more	48	

The bonuses for waste will continue to be applied (paper 0.10 per kg, plastic 0.15 per kg, glass 0.10 per kg) delivered to the collection Centre up to a maximum of € 30.00 per user.

With reference to the wet waste, on the other hand, all the necessary door-to-door transfers are included in the tax additional costs.

Comune di Trenzano
Via Vittorio Emanuele II
Trenzano (BS)

However, a 30% variable tariff reduction is foreseen in case of domestic users using composting systems of their own organic waste or which reduce the amount of wet waste using the organic waste to feed their own poultry, for these utilities with the payment of the TARI, the following number of wet waste inputs:

Wet waste refusals included for users who benefit from a 30% reduction in the variable tariff.	Number of components	number of wet waste collections included in the TARI per 20 l bin	Extra collections
	1	14	If this number of collections is exceeded, the 30% reduction will not be applied.
	2	20	
	3	26	
	4	30	
	5	34	
	6 ore more	36	

• NON-DOMESTIC UTILITIES

In the TARI of non-domestic users, it's included the assignment of a quantity of undifferentiated waste, divided by category of activity and compared to the litres per square meter (the summary table is available on the municipal website). To the litres exceeding the assigned quantity will be applied the single rate per litre of € 0.08.

The variable part of the tariff is expected to be reduced to a maximum of 20% if the users showed that they start to recover their waste.

The tax office, during the opening hours to the public or via e-mail at ufficiotributi@comune.trenzano.bs.it, is available to provide further information and / or clarifications.

Payment deadlines: May 15 (first instalment) and October 31 (second instalment). All collections exceeding the guaranteed quantity and those that will be carried to the Collection Center during the year will be added to balance adjustment in TARI 2020.
